

# Dean students hear theories of coverup in JFK assassination

By KEN TOKARZ

Of The News Staff

**F.RANKLIN** — Robert Katz of Addressing about 400 people Bureau in Cambridge feels the Tuesday night, Katz made the assassination of President John F. Kennedy was part of a charges after showing films and

conspiracy covered up by slides that he hoped supported those allegations. Katz showed a "copy of a copy", of a film made by Abraham Zapruder, who filmed the ill-fated Kennedy motor. The original film was purchased shortly after the assassination by Time Inc. for \$200,000, Katz said, but for unexplained reasons has not yet been shown publicly.

Katz said "bootleg copies" of the film were made during the time the Warren Commission subpoenaed the film from Time Inc. in its investigation of the assassination.

The original film was studied by the Warren Commission before it concluded Lee Harvey Oswald acted alone in the killing of Kennedy. Katz's copy of the Zapruder film shows Kennedy clutching his throat and beginning to lean forward after he is first hit; then he is suddenly rocked and a third hit Kennedy in the head, violently backward to his left, back, went through his throat, indicating Kennedy was shot from the front and not the rear, as concluded by the School Book Depository to the rear, as concluded by the Warren Commission.

...demands answers

"Katz did intercept though that he understood the original Zapruder film, owned by Time Inc., was scheduled to be shown on this Thursday, 12:30 a.m., on ABC-TV."

Based upon the injuries sustained by Kennedy, John Connally of Texas, who was riding in the presidential car, and to a bystander, Katz said he felt about six shots were fired in the assassination.

Those six shots, based upon the speed at which the Zapruder film moved, were all theorized that the assassination could have been coordinated by a walkie-talkie communication system.

He then pointed out that the World War II bolt-action rifle identified as the one owned and used by Oswald, can only be fired within approximately six seconds, Katz said.

He then pointed out that the
